COMMENTS:

There is only one intelligent method of transporting the waste - which will be transported! It should not be done by rail - Truck - or barge, if that were possible.

FLY THE Stuff in - Yes! Anyone who has been in a C-5 will know the capacity. Our government owns the Fleet - we now employ the finest crews - we have all the restricted air space needed. We can pick up & deliver anywhere in the world on 1st class or dirt landing strips!! No one need know of schedules or time tables - No sabotage can be planned - The Job Gets Done!! Quickly - Cleanly - Simply - And Cheaply!! Will it happen this way? Probably NOT. It's just too effecient

Please note: Your comment(s) must be received by the Department of Energy by June 1, 2004 to be considered. Comments received after the close of the comment period will be considered to the extent practicable.

If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so the address and postage-paid notice are visible, then secure with tape.

Please feel free to attach additional pages (if mailing, more postage may be needed).
